Peer-Reviewed, Scholarly, Academic - What does it all mean?

Scholarly/Academic sources are items that are written by academics and experts. They are aimed at an audience of academics, experts, or students. They are not intended for a general audience. Scholarly articles are not necessarily peer reviewed, but peer reviewed articles are always scholarly.

Peer Review describes the process that an article goes through before it can be published in a scholarly/academic journal. Peer-reviewed articles are also often called Academic, Scholarly, or Refereed. An academic or expert writes an article for an audience of other academics, experts, or students.

- The article is then submitted for review to the editors of an academic journal - Example: Editors of Social Science Quarterly are experts with specialist degrees in the particular field
- Editors review the article
- Options: Reject, Correct & Return, Accept - Social Science Quarterly accepts only about 15% of submissions!

Doing research in education?
Looking for more journals than SuperSearch covers? The ProQuest Education Journals database provides full text access to over 600 journals and indexes more than 1000. Covering the last 20 years in education, this database contains journals about primary, secondary, and higher education along with special education, home schooling, adult education, and related topics. Need Assistance finding these? Ask-A-Librarian!

March is National Women’s History Month!
National Women’s History Month’s roots go back to March 8, 1857, when women from New York City factories staged a protest over working conditions. International Women’s Day was first observed in 1909, but it wasn’t until 1981 that Congress established National Women’s History Week to be commemorated the second week of March. In 1987, Congress expanded the week to a month. Every year since, Congress has passed a resolution for Women’s History Month, and the President has issued a proclamation.

11.3 million
Number of women college students in fall 2012. Women comprised 56.8 percent of all college students.
