May is **Mental Health Awareness Month**, a time for people to learn more about mental health conditions and seek out help for them.

According to the National Institute of Mental Health, mental health concerns affect 1 in 10 Americans today, but fewer than 25 percent of people with a diagnosable mental disorder seek treatment. Mental Health Awareness Month hopes to help increase the number of people who will talk to their doctor or a mental health professional about their concerns.

"Knowledge is of two kinds. We know a subject ourselves, or we know where we can find information upon it."
- Samuel Johnson
