

INTRO/ABSTRACT

Gone Fishin' VR is a Virtual Reality game that allows the player to fish from the comfort of their own home. This take on a fishing simulator has creative and playful designs that are sure to surprise the players. With this game, we intend to invoke different comedic aspects found in other games such as designs, descriptions, and possible voiceovers in order to give the players a good time. This isn't the average fishing simulator.

METHODS

Team members work separately on their tasks and bring them together in the final product.

A Virtual Reality Fishing Simulator to bring the joys of fishing into your own living room.

RESULTS

The team gained an understanding in developing Virtual Reality projects. The game is not yet in its final stage of development.
